Office Action Summary

Art Unit: 1617

Applicant's election of a therapeutic agent, a hydrophilic release modulator, a hydrophobic active, and a particle in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 10, 11, 13, 18 rejected under 35 U.S.C. 102(e) as being anticipated by Bernstein et al.

Bernstein et al. teaches cationic release modifiers in matrices of biocompatible polymers (abstract). Polylactide glycoside is disclosed (column 3, line 62). 20-20% modifier is disclosed (column 5 lines 10-12). Steroids are specified (column 3 line 34).

Biodegradable polymers are specified (column 3 line 56). Microspheres are disclosed (column 12 line 8).

No claims allowed.
